

PRACTICAL NO – 6

Aim: Replication using Mongodb

Step 1: Go to file manager > local C >file data>create three folder
>primary, secondary1, secondary2

Step 2: Go to Window power shell and Create 3 port on new window powershell:2717, 2727, 2737

Code:

```
mongod --port=2717 --dbpath="C:\data\primary" --replSet="test-  
replica-set"
```

Output:

[illegible]

Code:

```
mongod --port=2727 --dbpath="C:\data\secondary1" --replSet="test-replica-set"
```

Output:

```
Windows PowerShell
